Objectives:

At the conclusion of this presentation, participants should be able to:

- 1 Discuss the epidemiology of neonatal abstinence syndrome and the implications on our healthcare system.
- 2 Describe the underlying physiologic mechanisms of neonatal abstinence syndrome and how non-pharmacologic interventions can mitigate the clinical signs and symptoms of neonatal abstinence syndrome.
- 3 Appraise critically the role rooming-in can play in reducing length of stay for infants at risk for neonatal abstinence syndrome through a review of current literature and findings from an internal evidence-based project.
